Abdullah Al Masrur

Highly motivated individual seeking for a challenging position in the computer science field. My strong command in Python, C, C++, PHP and with other languages has been proven by successfully designing, developing and implementing various state of the art projects. Eager to apply these gained knowledge and experience towards critical problem solving in an innovative way.

Work Experience

Front-End Developer, Fly AI Solution LLC (Remote)
December, 2024 - Present | Rochester, New York

- Development of responsive, fluid Front-End using Next.js & Tailwind
- Successfully integrating Back-End to the Front-End side
- Working on AWS Lightsail for web hosting
- Experimenting with creating EC2 instances for hosting Llama AI
- Co-Developer of Immigenius: https://i140.immigenius.us/

Projects

Hotel Management
Designed and manufactured a hotel management website using **Next.Js, Tailwind CSS, Supabase Database, Auth.Js** and various React & Next.Js libraries, enabling users to create reservation, edit their reservation, delete reservation before their booking dates.
